\$6,790M	Inability to authenticate eligibility: data needed does not exist	Approx. \$6.79B (94%) of total ACTC overclaims are from the inability to authenticate qualifying child eligibility requirements and taxpayer income misreporting. Errors caused by program design occur when information needed to confirm payment accuracy is not available at the time the return is processed.	IRS will continue current efforts such as examinations, math error, criminal investigation, etc. IRS will also continue outreach/education programs, and work with Treasury on legislative proposals to improve compliance and reduce overclaims.	Reduce taxpayer error pre-filing, educate taxpayers and paid preparers on the law and common filing errors.
